

now rocking the zhaw theme by implementing extensions

- this slide has an explicit footer
- and has a table

head 1	head 2	head 3
cell 1		cell 3

page numbering, footer, print

- automatic page numbering works
- when no explicit footer is given, an implicit footer with information on the lecture is inserted
- printing to pdf works: [zhaw_presentation.pdf](#)
 - *printed in chromium, a5, landscape mode*
 - *only in webkit. not in ff or ie, because it wouldn't take the background-colors of the header)*
