## p\_slides

## now rocking the zhaw theme by implementing extensions

- this slide has an explicit footer
- and has a table

head 1	head 2	head 3
cell 1		cell 3

Explicit footer with a link.

## page numbering, implicit footer zh print

- automatic page numbering works
- when no explicit footer is given, an implicit footer with information on the lecture is inserted
- printing to pdf works: zhaw\_presentation.pdf
  - printed in chromium, a5, landscape mode
  - only in webkit. not in ff or ie, because it wouldn't take the background-colors of the header)
